It may not be that easy. Some units, like the Radio Shack multi-channel model, cannot be modified. The cheapo kiddie HTs can probably be modified this way, but they are AM, and have a less-than-stellar receiver. If it's for a college project, fine, but don't expect to hit repeaters with them.

>"bps" or bits-per-second. It would seem that "bauds" would be like  
>bits per second<sup>2</sup>, or a measurement of the change in the transmission  
>speed of data. Of course, I may be wrong.

>

>73 de MC (no callsign, since no license)

Baud is essentially the frequency of the data signal. This is NOT the same as the carrier frequency. With FSK modulation, 1 bit is transmitted for each change in the data signal so in this case, Baud = bps.

The more sophisticated modems encode multiple bits per baud via phase encoding and other methods. Your 9600 bps modem communicates at 2400 baud, but can send 4 bits per baud yielding 9600 bps. (14.4K send 6 bits per baud)

Most people mistakenly equate baud 1:1 with bps. I dunno what ARRL folks do.

>A while ago I heard rumours that the FT-470 could be sent to Yaesu for a  
>modification to reduce the problem....Is that true? And where do I send my  
>unit?

If your unit is only 6 months old, then the hardware problem should have been fixed already, unless the store had one in stock from two or three years ago and sold it to you. And I believe that the hardware mod was for interference caused by the 162 MHz weather stations.

The problems you mention are typical of Ft-470s and other HTs with extended receive. You get something (more receive frequencies), you give up something. (selectivity)

In article <dbledsoeCFHryr.1tF@netcom.com> dbledsoe@netcom.com (Donnelly R. Bledsoe) writes:

>

>The problem here is that the complaint is about discrimination, not ad  
>placement. The ARRL refuses to address the issue in the complaint and to  
>engage in any dialogue that will lead toward resolution, instead sticking  
>to "the ad is acceptable" line of reasoning. Here's why, as nearly as I  
>can understand ... by saying that LARC's ad is acceptable, they believe  
>that LARC's complaint is no longer valid and that it is moot.

On the other hand, LARC's credibility is seriously in doubt, since they keep shouting the word 'discrimination' over and over again, like some sort of broken record. Yet when one of us says 'okay, other than the ad, what discrimination?' LARC says nothing. I at first thought that Mseers. Bledsoe and Kelly had missed the question. However, I'm now beginning to believe that LARC is also, to paraphrase, refusing to engage in any dialogue. I've seen Mr. Bledsoe post essentially the same response several times now, and never have I seen an enumeration of what this generic 'discrimination' is. Refusing dialogue with someone you find uncooperative may be a perfectly legitimate response, in this case. It is not in and of itself, a grievance.

> Our counsel  
>has been informed by the state investigator that the complaint is not  
>moot.

Well, of course. It keeps him in work! Look to your hearts, not the investigator.

>LARC believes that to go ahead and run the advertising without  
>resolution of the underlying issue will undermine its own complaint.

Oh? So you want the grounds for your complaint to persist?

> So,  
>until the ARRL will discuss the real issue of discrimination, the issue of  
>advertising cannot be resolved. LARC is ready and willing to discuss it  
>and to seek an amicable resolution. And yes, the complaint is still  
>active in CT.

Don, some of your words do not support the position you state.

Greg

Subject: Help Get Started as HAM  
To: info-hams@ucsd.edu

Well, As the sub says, I'm new to ham radio and would like someone to direct me to the proper FAQ or book that will tell me about the various areas of ham radio such as packet, UHF, repeaters, DTMF, etc. (I don't REALLY know what all that stuff means yet). I understand electronics fairly well, but can't find any UP-TO-DATE info on what ham radio offers.

Anyone who wishes , please help.

To: info-hams@ucsd.edu

USED HF & 6m RIG PRICE SURVEY  
26 Oct 1993 Version

Here is a list of actual transactions involving buying  
and selling of used HF amateur radios.

I have absolutely no affiliation with any ham-radio-related  
business. Rigs are sorted by maker, model, and price. All  
transactions were made within the past three years. I welcome  
any additional responses; please indicate maker and model of  
your used rig, date bought/sold, how sold (Usenet, retailer,  
on air, private, etc.), price, condition, and any accessories  
or options. This survey is limited to used HF and 6m rigs only.  
For prices on new rigs, consult the AES catalog, or call a  
ham retailer for a quote.

Subject: Need Manual for HP-2382A Terminal  
To: info-hams@ucsd.edu

I have an opportunity to acquire a HP-2382A Terminal that would be usefull  
for use with packet radio. No manual is available and there is a good  
sized collection of dip switches on the back of the display to contend  
with. Can anyone out there in net-land find a copy of the users manual?

Subject: Radio Shack HTs

To: info-hams@ucsd.edu

I am a soon-to-be-licensed ham, and I was looking at the HTs in Radio Shack today (2m and 70cm bands). Does anyone have any opinions of the quality of these radios for the price (\$249-299)? Does anyone know who manufactures them for R.S.? Any opinions etc would be appreciated by e-mail to cravitma@cps.msu.edu, or posted here. Thanks.

/MC
